Superpoints are only used in the event of mutualised restriction (congestion) or maintenance.

SP = superpoint

SSP = sub-superpoint

• : common GRTgaz-Teréga SP with transfer system.
Transfer points codes: TRNS2, TRNS3 and TREQ2

Limits and superpoints ingrid (2/2)

The superpoints bellow can **only** be used **for maintenance**

| Limits | Upstream superpoint (restricted entries) | | Downstream superpoint (restricted exits) |
|--------|---|--|---|
| N1 | SPN1U PIR Dunkerque PITTM Dunkerque LNG | | |
| N2 | SPN2U PIR Dunkerque PITTM Dunkerque LNG PIR Virtualys | | |
| N3 | SPN3U PIR Virtualys PIR Obergailbach | | |

* : PITTM Fos, Montoir and Le Havre can be included in SP when they come as bonus. However, they can not be included when they come as restricted points (upstream entries). In this case, the restriction is applied directly on the PITTM.
